Evidence — Lab 05: Edit, Review and Refine in LahLah Video

Capture a screenshot or file for each line. Evidence beats a description.

- □ EP01_v1.mp4 exported at 1080x1920, 9:16.
- □ The story review covers every scene with intended vs actual feeling and a specific change.
- □ The QC report has at least six parameters with values, targets and PASS or FAIL.
- □ Three fixes made — one in Higgsfield (drafted low-res first), two in the editor — each in the fix log.
- □ EP01_v2.mp4 passes every parameter that failed in v1.
- □ Screenshots of the LahLah Video timeline and the export settings saved as evidence.

Notes

What did not work first time, and what you changed:

What you could NOT verify:
