

NON-WSQ COURSE

Agentic AI for Video Creation

Create your first video, improve it, then build a repeatable series

C436 | v3.0 | 2 days / 15 hours

Tertiary Infotech Academy Pte Ltd
UEN 201200696W

MiniMax M3 • Four connected hands-on labs

Trainer profile

Your trainer guides practical AI-assisted video creation and creative review.

1

Visual storytelling

2

Prompt engineering

3

Video tools and reusable skills

4

Multi-agent creative workflows

Dr Alfred Ang

Principal Trainer, Tertiary Infotech Academy

1

Applied technology educator

2

AI and creative workflow curriculum

3

Hands-on, practical learning

4

Focus: clear, useful and consistent video stories

Learner introduction

Connect your experience to one video you would like to create.

1

Your role or interest

2

Your intended audience

3

A message worth sharing

4

A style you enjoy

Working agreements

RULE

Create responsibly and learn through visible drafts.

1

Use supplied or authorised assets

2

Do not share passwords or keys

3

Keep practice uploads private

4

Give specific, constructive feedback

Course facts and competency context

C436

Non-WSQ commercial short course

1

Course code: C436

2

Duration: 2 days / 15 instructional hours

3

Assessment: none

4

Version: v3.0 / 16 September 2026

Day 1 lesson plan

D1

Meet AI agents, set up Hermes, write stronger prompts and create your first two video versions.

1

AI agents and the agentic loop

2

Hermes Desktop and MiniMax M3

3

Video prompt engineering

4

Labs 01–02: create and improve

Day 2 lesson plan

D2

Build the agent team and create a consistent micro-drama episode.

1

Five Hermes profiles and Kanban

2

Private YouTube publishing and scheduling

3

Character and storyboard consistency

4

Labs 03–04 and course recap

Learning outcomes

LO

At course completion, you can create, improve and coordinate an AI-assisted video series.

1

LO1: Explain the agentic loop, set up Hermes Agent with MiniMax M3, and create a first short video from a clear prompt.

2

LO2: Improve the first video by choosing suitable video tools, adding reusable skills, and applying brand, tone and style guidance.

3

LO3: Coordinate research, script, video, review and YouTube agents on a Kanban board and schedule the workflow.

4

LO4: Plan a consistent one-minute micro-drama series with reusable story, character, location and visual references.

Access the labs

LAB

Four connected labs take one idea from first draft to a consistent one-minute story.

1

Open each folder in Hermes

2

Use supplied or authorised assets

3

Copy and adapt the prompt examples

4

Save each draft and review

[Open the GitHub course repository](#)

1

TOPIC 1

Meet AI Agents and Create Your First Video

Understand the agentic loop, set up Hermes with MiniMax M3, and turn one simple idea into a first video.

LEARN • CREATE • REVIEW • IMPROVE

What is an AI agent?: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Goal

Action

Plan

Review

COMMON MISTAKE

Treating every chatbot reply as a finished result.

What is an AI agent?: best practice

AVOID

Treating every chatbot reply as a finished result.

TRY THIS

Ask the agent to show its plan and review the output before stopping.

An agent does more than answer: it works through a goal and checks what it produced.

What is an AI agent?: prompt example

COPYABLE EXAMPLE

Idea: Create a 15-second welcome video for a neighbourhood cafe.

KEEP THESE CHOICES IN VIEW

Goal

Plan

Action

Review

An agent does more than answer: it works through a goal and checks what it produced.

The agentic loop: how it works

CREATIVE CHOICES TO KEEP IN VIEW

What do we have?

What can be done?

What should happen?

What needs changing?

COMMON MISTAKE

Repeating the same prompt without explaining what went wrong.

The agentic loop: best practice

AVOID

Repeating the same prompt without explaining what went wrong.

TRY THIS

Give one focused revision at a time: pacing, framing, colour, caption or sound.

The loop turns a vague idea into a series of visible creative decisions.

The agentic loop: prompt example

COPYABLE EXAMPLE

Observe the first draft, request a stronger opening, then compare both versions.

KEEP THESE CHOICES IN VIEW

What do we have?

What should happen?

What can be done?

What needs changing?

The loop turns a vague idea into a series of visible creative decisions.

Install Hermes Agent: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Mac or Windows

Open Hermes

Download

Choose a folder

COMMON MISTAKE

Downloading from an unofficial page or opening the wrong project folder.

Install Hermes Agent: best practice

AVOID

Downloading from an unofficial page or opening the wrong project folder.

TRY THIS

Use the official Hermes Desktop page and keep each video project in its own folder.

Hermes Desktop provides one place for chat, files, skills and agent profiles.

Install Hermes Agent: prompt example

COPYABLE EXAMPLE

Project folder: My First AI Video.

KEEP THESE CHOICES IN VIEW

Mac or Windows

Download

Open Hermes

Choose a folder

Hermes Desktop provides one place for chat, files, skills and agent profiles.

Connect MiniMax M3: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Account

Plan

Model

Test

COMMON MISTAKE

Assuming a promotion or free-trial duration is identical for every learner.

Connect MiniMax M3: best practice

AVOID

Assuming a promotion or free-trial duration is identical for every learner.

TRY THIS

Confirm the current trial and pricing shown in your account before subscribing.

MiniMax M3 can guide planning and operate tools; a video tool still creates the media.

Connect MiniMax M3: prompt example

COPYABLE EXAMPLE

Test prompt: Help me plan a three-shot vertical video about better coffee.

KEEP THESE CHOICES IN VIEW

Account

Plan

Model

Test

MiniMax M3 can guide planning and operate tools; a video tool still creates the media.

Prompt your first video: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Audience

Look and movement

Subject and action

Length and format

COMMON MISTAKE

Using adjectives such as amazing or cinematic without describing what viewers see.

Prompt your first video: best practice

AVOID

Using adjectives such as amazing or cinematic without describing what viewers see.

TRY THIS

Use **SUBJECT + ACTION + SETTING + CAMERA + STYLE + FORMAT**, then ask for a shot list first.

The best starter prompt describes one audience, one message and one simple visual journey.

Prompt your first video: prompt example

COPYABLE EXAMPLE

Create a 15-second vertical cafe tip video: warm morning light, close-up coffee grind, slow push-in, calm practical tone, three five-second shots, captions included.

KEEP THESE CHOICES IN VIEW

Audience

Subject and action

Look and movement

Length and format

The best starter prompt describes one audience, one message and one simple visual journey.

A useful first-video idea

1

One audience

2

One message

3

Three shots

4

One action

The six ingredients of a strong video prompt

1

Subject

2

Action

3

Setting

4

Camera

5

Style

6

Format

Prompt in two stages

1

Ask for the shot list

2

Review the story

3

Approve the direction

4

Create the draft

Improve the prompt, not every effect

1

Clarify the opening

2

Remove extra actions

3

Name the mood

4

End with a purpose

See the whole creative journey

THREE PRACTICAL TIPS

1

Ask the agent to show its plan and review the output before stopping.

2

Give one focused revision at a time: pacing, framing, colour, caption or sound.

3

Use the official Hermes Desktop page and keep each video project in its own folder.

Turn vague words into visible choices

PROMPT EXAMPLES

1

Project folder: My First AI Video.

2

Test prompt: Help me plan a three-shot vertical video about better coffee.

3

Create a 15-second vertical cafe tip video: warm morning light, close-up coffee grind, slow push-in, calm practical tone, three five-second shots, captions included.

Lab 01 · Create Your First Video with Hermes

SCENARIO

Install Hermes Desktop, connect MiniMax M3, improve a simple prompt and create a 15-second first video.

EXPECTED OUTPUT

A first 15-second video, final prompt and review notes

Detailed click paths, prompts, troubleshooting and acceptance checks are in the Learner Guide and lab PDF.

Open Lab 01 from the course repository.

Lab 01 · creative journey

Move from idea to draft, then pause to review what a viewer will actually experience.

Lab 01 · review and improve

SUCCESS LOOKS LIKE

Hermes opens the correct project, MiniMax M3 is selected or the available approved fallback is recorded, the shot list has three clear shots, and the first video is saved.

PAUSE AND REWORK WHEN

the story is unclear, style changes between shots, an asset is not authorised, or publishing approval is missing.

PROMPT

save what you asked

DRAFT

watch as a viewer

FEEDBACK

name exact changes

VERSION 2

compare the result

Topic 1 creative checkpoint

1

What will the viewer understand in the opening seconds?

2

Which visual choice makes the message easier to follow?

3

What should remain consistent from shot to shot?

4

What feedback would improve the next version most?

Topic 1 try it your way

1

Adapt one example prompt to your own audience and subject.

2

Replace vague style words with visible creative choices.

3

Plan one review question before asking Hermes to create.

4

Name the one improvement you will make before adding effects.

2

TOPIC 2

Improve the Video with Tools and Skills

Understand tools and skills, add suitable video capabilities, and turn the first draft into a polished branded video.

LEARN • CREATE • REVIEW • IMPROVE

What is a tool?: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Images

Voice

Motion

Editing

COMMON MISTAKE

Choosing a tool because it is fashionable instead of because it fits the shot.

What is a tool?: best practice

AVOID

Choosing a tool because it is fashionable instead of because it fits the shot.

TRY THIS

Match the tool to the job: generate, animate, assemble, caption or check.

A tool performs a practical job such as creating a shot, animating text or assembling clips.

What is a tool?: prompt example

COPYABLE EXAMPLE

Use Higgsfield for a cinematic shot, Remotion for branded motion graphics, Manim for an explanatory animation, and FFmpeg for assembly.

KEEP THESE CHOICES IN VIEW

Images

Motion

Voice

Editing

A tool performs a practical job such as creating a shot, animating text or assembling clips.

What is a skill?: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Trigger

Steps

Creative rules

Expected result

COMMON MISTAKE

Writing a skill that is so broad that it gives different results every time.

What is a skill?: best practice

AVOID

Writing a skill that is so broad that it gives different results every time.

TRY THIS

Make one skill for one repeatable outcome, such as a branded 15-second product tip.

A skill teaches Hermes how you want a recurring task done.

What is a skill?: prompt example

COPYABLE EXAMPLE

Skill: Create a calm Harbour Bean short using the approved colours, caption style and closing frame.

KEEP THESE CHOICES IN VIEW

Trigger

Creative rules

Steps

Expected result

A skill teaches Hermes how you want a recurring task done.

Choose the right video toolkit: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Generative shots

Diagrams

Motion graphics

Final edit

COMMON MISTAKE

Adding several tools before the creative direction is clear.

Choose the right video toolkit: best practice

AVOID

**Adding several tools
before the creative
direction is clear.**

TRY THIS

**Choose the simplest tool
that can deliver the
intended shot and keep
the style consistent.**

Most videos need a small toolkit, not every available tool.

Choose the right video toolkit: prompt example

COPYABLE EXAMPLE

First draft + one generated establishing shot + branded title cards + captions + music.

KEEP THESE CHOICES IN VIEW

Generative shots

Motion graphics

Diagrams

Final edit

Most videos need a small toolkit, not every available tool.

Improve with a creative brief: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Hook

Value

Proof

Call to action

COMMON MISTAKE

Trying to repair a weak story with transitions and filters.

Improve with a creative brief: best practice

AVOID

Trying to repair a weak story with transitions and filters.

TRY THIS

Rewrite the video as Hook - Value - Proof - Action before asking for new visuals.

A clear narrative improves the video more than extra effects.

Improve with a creative brief: prompt example

COPYABLE EXAMPLE

Hook: Your coffee tastes bitter. **Value:** check the grind. **Proof:** compare two textures. **Action:** save this guide.

KEEP THESE CHOICES IN VIEW

Hook

Value

Proof

Call to action

A clear narrative improves the video more than extra effects.

Create your own video skill: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Colours and logo

Pacing

Voice

Do and avoid

COMMON MISTAKE

Defining style only as modern, engaging or professional.

Create your own video skill: best practice

AVOID

Defining style only as modern, engaging or professional.

TRY THIS

Include concrete examples: colours, shot rhythm, caption placement, words to use and styles to avoid.

A custom skill makes good creative choices repeatable across future videos.

Create your own video skill: prompt example

COPYABLE EXAMPLE

Calm, useful and warm; steady camera; short sentences; cream background; teal accent; no flashing text.

KEEP THESE CHOICES IN VIEW

Colours and logo

Voice

Pacing

Do and avoid

A custom skill makes good creative choices repeatable across future videos.

Tools have different creative jobs

1

Generate a shot

2

Animate a message

3

Explain a concept

4

Assemble the edit

Skills make choices repeatable

1

Brand rules

2

Tone

3

Shot rhythm

4

Caption style

A simple improvement plan

1

Keep what works

2

Fix the story first

3

Add one useful tool

4

Compare versions

Create a recognisable style

1

Repeat colours

2

Repeat type

3

Repeat movement

4

Repeat voice

Choose tools by creative need

THREE PRACTICAL TIPS

1

Match the tool to the job: generate, animate, assemble, caption or check.

2

Make one skill for one repeatable outcome, such as a branded 15-second product tip.

3

Choose the simplest tool that can deliver the intended shot and keep the style consistent.

Compare the first and improved video

PROMPT EXAMPLES

1

First draft + one generated establishing shot + branded title cards + captions + music.

2

Hook: Your coffee tastes bitter. Value: check the grind. Proof: compare two textures. Action: save this guide.

3

Calm, useful and warm; steady camera; short sentences; cream background; teal accent; no flashing text.

Lab 02 · Improve the Video with Tools and Skills

SCENARIO

Choose appropriate video tools, add reusable Hermes skills and create a more polished branded version of the first video.

EXPECTED OUTPUT

A polished branded video and before-after comparison

Detailed click paths, prompts, troubleshooting and acceptance checks are in the Learner Guide and lab PDF.

Open Lab 02 from the course repository.

Lab 02 · creative journey

Move from idea to draft, then pause to review what a viewer will actually experience.

Lab 02 · review and improve

SUCCESS LOOKS LIKE

The learner explains the difference between a tool and a skill, chooses suitable capabilities, applies the brand guide, and produces an improved second video with a written comparison.

PAUSE AND REWORK WHEN

the story is unclear, style changes between shots, an asset is not authorised, or publishing approval is missing.

PROMPT

save what you asked

DRAFT

watch as a viewer

FEEDBACK

name exact changes

VERSION 2

compare the result

Topic 2 creative checkpoint

1

What will the viewer understand in the opening seconds?

2

Which visual choice makes the message easier to follow?

3

What should remain consistent from shot to shot?

4

What feedback would improve the next version most?

Topic 2 try it your way

1

Adapt one example prompt to your own audience and subject.

2

Replace vague style words with visible creative choices.

3

Plan one review question before asking Hermes to create.

4

Name the one improvement you will make before adding effects.

3

TOPIC 3

Build a Multi-Agent Video Team

Create five Hermes profiles, coordinate them on Kanban, improve the video, prepare YouTube publishing and schedule the pipeline.

LEARN • CREATE • REVIEW • IMPROVE

Why use multiple agents?: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Research

Video

Script

Review

COMMON MISTAKE

Using many agents for a task that one clear conversation could complete.

Why use multiple agents?: best practice

AVOID

Using many agents for a task that one clear conversation could complete.

TRY THIS

Create another agent only when the role has a distinct outcome and point of view.

Separate roles make the creative process easier to follow and improve.

Why use multiple agents?: prompt example

COPYABLE EXAMPLE

A research agent finds facts; a script agent turns facts into a story; a review agent challenges the result.

KEEP THESE CHOICES IN VIEW

Research

Script

Video

Review

Separate roles make the creative process easier to follow and improve.

Create five Hermes profiles: how it works

CREATIVE CHOICES TO KEEP IN VIEW

- | | |
|-----------------------|--------------------------------|
| Research agent | Script agent |
| Video agent | Audit and upload agents |

COMMON MISTAKE

Giving every profile the same vague instruction to make the video better.

Create five Hermes profiles: best practice

AVOID

Giving every profile the same vague instruction to make the video better.

TRY THIS

State what each profile receives, what it returns and when its work is complete.

A profile gives each agent a stable job, voice and set of responsibilities.

Create five Hermes profiles: prompt example

COPYABLE EXAMPLE

Research returns a fact sheet; Script returns a one-minute script; Video returns a draft; Auditor returns clear feedback; Upload returns a private YouTube link.

KEEP THESE CHOICES IN VIEW

Researcher

Scriptwriter

Video creator

Auditor

YouTube publisher

A profile gives each agent a stable job, voice and set of responsibilities.

Use Kanban to coordinate the team: how it works

CREATIVE CHOICES TO KEEP IN VIEW	
Task	Owner
Input	Next step

COMMON MISTAKE

Moving the upload card forward before review is complete.

Use Kanban to coordinate the team: best practice

AVOID

Moving the upload card forward before review is complete.

TRY THIS

Make the order visible and keep publishing blocked until review and approval are done.

Kanban shows who is doing what and what must happen next.

Use Kanban to coordinate the team: prompt example

COPYABLE EXAMPLE

First research, then write the script, create the video, review it, ask for human approval, and finally upload to YouTube.

KEEP THESE CHOICES IN VIEW

Task

Owner

Input

Next step

Kanban shows who is doing what and what must happen next.

Publish to YouTube: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Channel

Privacy

Metadata

Final approval

COMMON MISTAKE

Publishing publicly on the first automated run.

Publish to YouTube: best practice

AVOID

Publishing publicly on the first automated run.

TRY THIS

Ask Hermes to set up the YouTube connection, upload privately, and stop for human review.

Private upload creates a safe review step before the audience can see the video.

Publish to YouTube: prompt example

COPYABLE EXAMPLE

Prompt: Upload the approved video as Private, add the supplied title and description, then return the private review link. Do not publish publicly.

KEEP THESE CHOICES IN VIEW

Channel

Metadata

Privacy

Final approval

Private upload creates a safe review step before the audience can see the video.

Schedule the pipeline: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Day and time

Approval point

Topic source

Notification

COMMON MISTAKE

Automating an untested pipeline or forgetting who approves publication.

Schedule the pipeline: best practice

AVOID

Automating an untested pipeline or forgetting who approves publication.

TRY THIS

Run the whole pipeline once, inspect every handoff, then enable the schedule.

Scheduling works best when the workflow is already reliable as a manual run.

Schedule the pipeline: prompt example

COPYABLE EXAMPLE

Every Tuesday at 9:00 AM: research one topic, draft, create, review, wait for approval, then upload privately.

KEEP THESE CHOICES IN VIEW

Day and time

Topic source

Approval point

Notification

Scheduling works best when the workflow is already reliable as a manual run.

Five agents, five clear outcomes

1

Research notes

2

Script

3

Video draft

4

Audit

5

Private upload

The Kanban journey

Publishing is a separate decision

1

Prepare metadata

2

Upload privately

3

Watch the result

4

Approve public release

Schedule only a proven workflow

1

Run manually

2

Fix handoffs

3

Rehearse schedule

4

Enable when ready

See the agent team at work

THREE PRACTICAL TIPS

1

Create another agent only when the role has a distinct outcome and point of view.

2

State what each profile receives, what it returns and when its work is complete.

3

Make the order visible and keep publishing blocked until review and approval are done.

Keep review before publishing

PROMPT EXAMPLES

1

First research, then write the script, create the video, review it, ask for human approval, and finally upload to YouTube.

2

Prompt: Upload the approved video as Private, add the supplied title and description, then return the private review link. Do not publish publicly.

3

Every Tuesday at 9:00 AM: research one topic, draft, create, review, wait for approval, then upload privately.

Lab 03 · Improve the Video with a Multi-Agent Team

SCENARIO

Create five Hermes profiles, coordinate them on Kanban, improve the video, prepare a private YouTube upload and set a paused schedule.

EXPECTED OUTPUT

A team-created video, review notes, private upload and paused schedule

Detailed click paths, prompts, troubleshooting and acceptance checks are in the Learner Guide and lab PDF.

Open Lab 03 from the course repository.

Lab 03 · creative journey

Publishing stays paused until the reviewer and learner approve the final draft.

Lab 03 · review and improve

SUCCESS LOOKS LIKE

Five distinct profiles and a dependency-based Kanban board exist, the first video is improved through the team, YouTube is prepared as private, and the schedule remains paused until approval.

PAUSE AND REWORK WHEN

the story is unclear, style changes between shots, an asset is not authorised, or publishing approval is missing.

PROMPT

save what you asked

DRAFT

watch as a viewer

FEEDBACK

name exact changes

VERSION 2

compare the result

Topic 3 creative checkpoint

1

What will the viewer understand in the opening seconds?

2

Which visual choice makes the message easier to follow?

3

What should remain consistent from shot to shot?

4

What feedback would improve the next version most?

Topic 3 try it your way

1

Adapt one example prompt to your own audience and subject.

2

Replace vague style words with visible creative choices.

3

Plan one review question before asking Hermes to create.

4

Name the one improvement you will make before adding effects.

4

TOPIC 4

Create a Consistent One-Minute Micro-Drama Series

Use a story bible, character sheet and six-shot storyboard to create repeatable one-minute episodes with consistent people, places and style.

LEARN • CREATE • REVIEW • IMPROVE

Start with the series promise: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Who watches?

What repeats?

Where does it happen?

Why return?

COMMON MISTAKE

Beginning with isolated scenes before deciding what the series is about.

Start with the series promise: best practice

AVOID

Beginning with isolated scenes before deciding what the series is about.

TRY THIS

Write one sentence that describes the world, character and recurring emotional question.

A series feels consistent when every episode fulfils the same clear promise.

Start with the series promise: prompt example

COPYABLE EXAMPLE

In a neighbourhood cafe, a shy barista solves one small customer misunderstanding in every one-minute episode.

KEEP THESE CHOICES IN VIEW

Who watches?

Where does it happen?

What repeats?

Why return?

A series feels consistent when every episode fulfils the same clear promise.

Build a character bible: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Face and age

Voice and manner

Hair and wardrobe

Reference views

COMMON MISTAKE

Changing clothing, age, hairstyle or personality between shots.

Build a character bible: best practice

AVOID

Changing clothing, age, hairstyle or personality between shots.

TRY THIS

Use the same reference image and repeat five essential traits in every character prompt.

Consistency comes from repeating concrete character details, not just the character name.

Build a character bible: prompt example

COPYABLE EXAMPLE

Mei, 28, shoulder-length black hair, teal overshirt, cream apron, observant expression, gentle measured speech.

KEEP THESE CHOICES IN VIEW

Face and age

Hair and wardrobe

Voice and manner

Reference views

Consistency comes from repeating concrete character details, not just the character name.

Storyboard a one-minute episode: how it works

CREATIVE CHOICES TO KEEP IN VIEW

0-5 seconds

20-40 seconds

5-20 seconds

40-60 seconds

COMMON MISTAKE

Asking one prompt to generate the full minute with many changing actions.

Storyboard a one-minute episode: best practice

AVOID

Asking one prompt to generate the full minute with many changing actions.

TRY THIS

Create the storyboard first, then generate each shot separately using the same references.

Six short shots give a one-minute story enough movement without becoming confusing.

Storyboard a one-minute episode: prompt example

COPYABLE EXAMPLE

Six shots: arrival, clue, reaction, misunderstanding, reveal, emotional closing image.

KEEP THESE CHOICES IN VIEW

0-5 seconds

5-20 seconds

20-40 seconds

40-60 seconds

Six short shots give a one-minute story enough movement without becoming confusing.

Keep continuity across shots: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Character reference

Prop list

Location reference

Previous-frame check

COMMON MISTAKE

Describing only what changes and forgetting what must stay the same.

Keep continuity across shots: best practice

AVOID

Describing only what changes and forgetting what must stay the same.

TRY THIS

Add a continuity line to every shot prompt and compare adjacent frames before moving on.

Each new shot should inherit what must remain unchanged from the previous shot.

Keep continuity across shots: prompt example

COPYABLE EXAMPLE

Keep Mei's teal overshirt, cream apron, hairstyle and left-to-right movement unchanged; same morning cafe lighting.

KEEP THESE CHOICES IN VIEW

Character reference

Location reference

Prop list

Previous-frame check

Each new shot should inherit what must remain unchanged from the previous shot.

Use the agentic pipeline for a series: how it works

CREATIVE CHOICES TO KEEP IN VIEW

Series bible

Approved references

Episode brief

Continuity notes

COMMON MISTAKE

Starting every episode from a blank prompt and repeating old mistakes.

Use the agentic pipeline for a series: best practice

AVOID

Starting every episode from a blank prompt and repeating old mistakes.

TRY THIS

After release, save what worked as examples and revise the series skill before the next episode.

The team improves over time when each episode updates reusable story and visual references.

Use the agentic pipeline for a series: prompt example

COPYABLE EXAMPLE

Episode 02 reuses the same character pack, cafe reference, title style, sound palette and review checklist.

KEEP THESE CHOICES IN VIEW

Series bible

Episode brief

Approved references

Continuity notes

The team improves over time when each episode updates reusable story and visual references.

Build the micro-drama visually

THREE PRACTICAL TIPS

1

Write one sentence that describes the world, character and recurring emotional question.

2

Use the same reference image and repeat five essential traits in every character prompt.

3

Create the storyboard first, then generate each shot separately using the same references.

Check character consistency shot by shot

PROMPT EXAMPLES

1

Six shots: arrival, clue, reaction, misunderstanding, reveal, emotional closing image.

2

Keep Mei's teal overshirt, cream apron, hairstyle and left-to-right movement unchanged; same morning cafe lighting.

3

Episode 02 reuses the same character pack, cafe reference, title style, sound palette and review checklist.

Lab 04 · Create a One-Minute Micro-Drama Episode

SCENARIO

Create a series promise, character bible, six-shot storyboard and consistent one-minute pilot episode using the Hermes agentic pipeline.

EXPECTED OUTPUT

A one-minute pilot, storyboard and continuity review

Detailed click paths, prompts, troubleshooting and acceptance checks are in the Learner Guide and lab PDF.

Open Lab 04 from the course repository.

Lab 04 · creative journey

Move from idea to draft, then pause to review what a viewer will actually experience.

Lab 04 · review and improve

SUCCESS LOOKS LIKE

The series and character bibles are complete, the storyboard covers six timed shots, the same character and setting details appear throughout, and the continuity review identifies or clears visible changes.

PAUSE AND REWORK WHEN

the story is unclear, style changes between shots, an asset is not authorised, or publishing approval is missing.

PROMPT

1

What will the viewer understand in the opening seconds?

2

Which visual choice makes the message easier to follow?

3

What should remain consistent from shot to shot?

4

What feedback would improve the next version most?

Topic 4 try it your way

1

Adapt one example prompt to your own audience and subject.

2

Replace vague style words with visible creative choices.

3

Plan one review question before asking Hermes to create.

4

Name the one improvement you will make before adding effects.

Course achievement map

1

LO1: Explain the agentic loop, set up Hermes Agent with MiniMax M3, and create a first short video from a clear prompt.

2

LO2: Improve the first video by choosing suitable video tools, adding reusable skills, and applying brand, tone and style guidance.

3

LO3: Coordinate research, script, video, review and YouTube agents on a Kanban board and schedule the workflow.

4

LO4: Plan a consistent one-minute micro-drama series with reusable story, character, location and visual references.

Before you publish

VIEW

Pause once and watch the video as your audience would.

1

Is the story clear without explanation?

2

Are the people, places and style consistent?

3

Are the facts and assets authorised?

4

Has a person approved the final version?

Create stories people can follow and remember.

Clear prompt • Consistent style • Thoughtful review
