

Hermes Cron Commands

```
hermes cron create "0 9 * * 2" "Use the self-contained prompt in starter/release-job-prompt.md" --skill harl  
hermes cron list  
hermes cron status
```

Create the job paused through Hermes chat or the supported edit command, inspect the returned job ID, trigger one dry run, then enable only after approval. Never edit `~/hermes/cron/jobs.json` directly.
